Tayrona foods

We are a passionate team of coffee lovers committed to bringing you exceptional coffee experiences while valuing our native Colombia.

To us, everything happens around the fascinating world of coffee. From the unique aromas to the variety of flavors, we invite you to delight your senses with our delicious coffees.

About us

We grew up in Colombia, surrounded by the unique smells of street food and picturesque coffee plantations.

With our degrees in Agricultural Engineering and Business Administration, we have combined our passion for food, trading, and coffee. Our life stations in America, Spain and Germany have brought us valuable insights and experiences.

We have been in the coffee, Latin American and Spanish delicacies purchasing business for over 10 years. During this time, we have developed a deep understanding of which quality aspects are crucial to achieve the best taste. From the selection of raw materials to the accurate processing, we know exactly what it takes to offer outstanding products.

Our knowledge and expertise allow us to offer excellent coffees and delicious delicacies from Latin America and Spain. We pride ourselves on offering our customers unique taste experiences while taking them on a culinary journey through authentic flavors. And of course: we gladly enjoy every opportunity to visit our old home country!

V elemento

Our ancestors have always had a close relationship with their natural environment. In harmony with the Four Elements - Water, Fire, Air and Earth - they shape their lives. This perfectly describes our coffeeline.

Our journey to create the perfect coffee begins with the Earth Element. We actively seek out the best coffee farms around the world, where fertile soils provide the foundation for high-quality coffee beans. From the fruitful plantations of Latin America to the exotic growing regions of Africa, sustainability and fair trade are our focus.

Water plays a vital role in the brewing of coffee. That's why we use only top-quality water that is perfectly matched to the individual requirements of each coffee. The right quantity and quality of Water unfolds the aromas and flavors in every cup.

V elemento

The Air Element is also an essential component to our coffee making passion. We place great importance on freshly roasted coffee beans that preserve their unique aroma and flavor. That's why we roast in small batches to ensure that each cup you enjoy is filled with freshness and aroma.

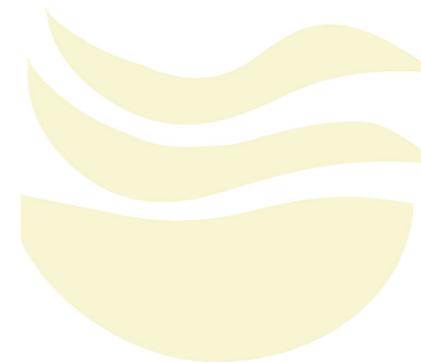

Last but not least, we focus on the Fire Element - the passion that leads every step of our work. From the selection of green coffees to the careful roasting and loving preparation, we put our heart and soul into providing you with an exceptional coffee experience.

Brasil de Andrade

Jose Ismael de Andrade and his brother Eduardo have been running the company ABEX (Andrade Brother Exportacion) for years. The Andrade family has been running coffee farms (such as Fazenda Capim Branco) since 1901.

Ismael Andrade is one of the founding members of BSCA (Brazilian Specialties Organization), together with 11 other farmers they were able to acquire an export license and to create a solid foundation for a fair value proposition. In 1991 the farm started its own export for the first time. Many international awards (such as Cup of Excellence) have been won, confirming the uniquely good work of the Andrade family on the high plateau in the Cerrado region. This mild coffee from the Arabica growing country No.1 Brazil captivates with notes of honey, chocolate, and light fruit flavors.

Colombia El Pastelito

The whole ripe coffee cherries are sun-dried. Between blossom and harvest 30-32 weeks pass. The soil is firm, sandy and without clay. This has its origin in volcanic ash with 20% organic substances and is very permeable to water - "picking method".

For generations, this family in Colombia has been intensively involved in the cultivation of high-quality coffee beans. As small producers, they attach great importance to the quality of their coffee and to maintaining the balance in the ecosystem, as well as to paying the farm workers fairly. With the creation of "Don Antonio Coffee" it is now possible to improve the economic situation of the farmers in the region. They are conscious of their environment and always aim to use only ecologically friendly products.

Peru Grad 1

This coffee comes from the Yakumama cooperative from Cajamarca in northern Peru. By locals in Peru, Yakumama is understood as a link between coffee farmers and buyers who are aware of sustainability. Yakumama is the name of a group of people who appreciate the blessing of their home country and consciously wants to give something back to the country's producers.

Through faire cooperation, they learn from each other, improving processes and ensuring and increasing the quality of their coffee.

Peru Grade 1 coffee has natural flavors of dark chocolate, tropical fruit and vanilla. A spicy coffee made from 100% Arabica beans.

Uganda Ngoma

Robusta can also taste great - here's the proof from Uganda: A great coffee with aromas of dark chocolate and dried plums. A sweet, slightly nutty note rounds off this fantastic coffee.

With its low residual sweetness, similar to honey, this strong espresso has a very nice balance, because Robusta beans can often exceed the target.

Social Project

We believe in the power of coffee to connect people, enrich cultures and create positive change. For this reason, we have created a special program: For every coffee bag you purchase from us, we donate 5 cents to a school in our village. In this way, we want to ensure that future generations receive a good education and can also achieve their dreams.

We work closely with local coffee farmers to source high quality beans directly from the region. Each cup of coffee you enjoy with us is therefore a small contribution to sustainable development and appreciation of our wonderful home country. Be part of our coffee evolution and discover a new dimension of pleasure. Immerse yourself in the world of Tayrona Foods, where coffee is not only a passion, but also a source of change and support for all participants.
